Professional Summary

Results-driven Computer Science Engineering student (CGPA 8.0) with hands-on experience building and deploying full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in REST API development, JWT authentication, Agile methodologies, and CI/CD workflows. Experienced in machine learning using Python, CNN, and YOLOv8. Seeking a MERN Full Stack Developer role to build scalable, high-impact web applications.

Technical Skills

Languages: JavaScript, Python, C **Frontend:** HTML5, CSS3, React.js, Tailwind CSS, Responsive Web Design
Backend: Node.js, Express.js, REST API, CI/CD **Database:** MongoDB, Mongoose, CRUD Operations
Auth & Security: JWT (JSON Web Tokens), bcrypt **Tools:** Git, GitHub, VS Code, Postman, Netlify, Render, Docker
Methodologies: Agile, MVC Architecture, Version Control **AI / ML:** CNN, YOLOv8, TensorFlow, OpenCV, Deep Learning

Internship & Training

MERN Full Stack Developer Intern — Agasthiya ITech Private Limited

Feb-june 2026

- Developed and deployed 3+ full-stack web applications using the MERN stack, collaborating in an Agile team environment with weekly sprints.
- Designed and integrated 15+ RESTful API endpoints with JWT authentication, reducing unauthorized access incidents to zero during testing.
- Implemented CI/CD pipelines using Git and GitHub Actions, cutting manual deployment time by 40%.

Projects

Skin Cancer Detection — CNN & YOLOv8 (ML)

- Engineered an AI-based skin cancer detection system using CNN and YOLOv8, achieving ~90% classification accuracy across 2,000+ skin lesion images.
- Built full image preprocessing pipeline (augmentation, normalization, train/val split) improving model generalization by 15%.
- Evaluated performance with precision, recall, and F1-score using TensorFlow and OpenCV; model deployed for real-time inference.

CLI-Based LMS — Learning Management System (Full Stack)

- Built CLI-based LMS supporting 3 user roles (Admin, Instructor, Student) with Node.js, Express.js, and MongoDB managing 50+ test records.
- Designed 12+ RESTful API endpoints for course creation, enrollment, progress tracking, and grade management with Mongoose ODM.
- Secured application with JWT authentication and role-based access control, achieving zero unauthorized access in all test scenarios.

BookMyShow Clone (Backend)

- Built REST API backend for a movie ticket booking platform using Express.js and MongoDB, supporting real-time seat availability for 100+ seats per show.
- Implemented dynamic seat selection with live availability updates, reducing booking conflicts by validating seat state before every transaction.

To-Do List Application (Backend)

- Developed RESTful backend with Node.js, Express.js, and MongoDB; implemented full CRUD for task management with status tracking and timestamps.
- Structured Mongoose schemas with field validation, achieving consistent data integrity across 200+ test operations.

Portfolio Website (Frontend)

- Built responsive portfolio using HTML5, Tailwind CSS, and JavaScript with mobile-first design; deployed on Netlify with optimized load time under 2s.

Education

Cauvery Institute of Technology, Mandya — B.E. Computer Science | CGPA: 8.0

2022–2026

BGS College Nagamangala — PUC | 63%

2020–2022

Rotary School Nagamangala — SSLC | 80%

2019–2020

Certifications

MERN Full Stack Developer Certification — Agasthiya ITech Private Limited

End-to-end MERN stack development: REST APIs, JWT auth, MongoDB, and deployment. Delivered 3 full-stack projects during the program.

Data Science, AI and ML Certification — Cranes Varsity

Python, data analysis, model building, and deep learning with hands-on projects on real-world datasets using industry-standard tools.

Data Science Workshop — Raaya Infotech Solutions

Hands-on workshop covering data preprocessing, visualization, and ML algorithms applied to real datasets in mini-projects.

Declaration

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
