

Supreetha C.R

7975575642 | supreethas745@gmail.com

Professional Summary

Results-driven Computer Science Engineering student with hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in REST API development, database design with Mongoose, and deploying responsive web applications. Experienced in machine learning model development using Python, CNN, and YOLOv8. Seeking a MERN Full Stack Developer role to contribute to innovative web application development.

Technical Skills

Programming Languages: JavaScript, Python, C

Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS, Responsive Web Design

Backend Technologies: Node.js, Express.js, REST API Development

Database: MongoDB, Mongoose

Authentication & Security: JWT (JSON Web Tokens)

Tools & Platforms: Git, GitHub, VS Code, Postman, Netlify, Render

Methodologies: Agile Development, Problem Solving, MVC Architecture

AI / ML: CNN, YOLOv8, Image Preprocessing, Model Training, Deep Learning

Projects

Skin Cancer Detection Using CNN and YOLOv8 (Machine Learning)

- Engineered an AI-based skin cancer detection system using CNN and YOLOv8, achieving ~90% classification accuracy on a dataset of 2,000+ skin lesion images.
- Implemented full image preprocessing pipeline including augmentation, normalization, and train/validation splitting to improve model generalization.
- Evaluated model performance using precision, recall, and F1-score metrics using Python-based deep learning libraries (TensorFlow, OpenCV).

CLI-Based LMS — Learning Management System (Full Stack)

- Developed a command-line interface Learning Management System supporting 3 user roles: Admin, Instructor, and Student, using Node.js and MongoDB.
- Built RESTful API endpoints with Express.js for course creation, student enrollment, progress tracking, and grade management.
- Implemented JWT-based authentication and Mongoose ODM for structured data modeling and secure access control.

BookMyShow Clone (Backend)

- Built a full-stack movie ticket booking application using React.js, Express.js, and MongoDB with REST API integration.
- Implemented features including movie listing, dynamic seat selection, and ticket booking with real-time seat availability updates.

Portfolio Website (Frontend)

- Developed a fully responsive personal portfolio website using HTML5, Tailwind CSS, and JavaScript, deployed on Netlify.
- Implemented a modern, mobile-first UI showcasing projects, skills, and certifications with optimized page load performance.

Education

• Cauvery Institute of Technology, Mandya Bachelor of Engineering — Computer Science 8.0 CGPA	2022–2026
• BGS College Nagamangala PUC (Pre-University Course) 63%	2020–2022
• Rotary School Nagamangala SSLC (Secondary School Leaving Certificate) 80%	2019–2020

Personal Details

- **LinkedIn** : [linkedin.com/in/supreetha-gowda](https://www.linkedin.com/in/supreetha-gowda)
- **GitHub** : github.com/Supreetha2004
- **Portfolio** : supreetha.netlify.app

Certifications

- MERN Full Stack Developer Certification — Agsthiya ITech Private Limited
- Data Science, AI and ML Certification — Cranes Varsity
- Data Science Workshop — Raaya Infotech Solutions
